

PLATES & LETTERING

CHROMOTION®

Your design freedom in perfection

CHROMOTION offers you a unique creative range thanks to its variety of possible shapes. Individually shaped single letters, linked lettering and emblems in different heights - anything is possible with us.

Our CHROMOTION consists of several perfectly combined plastic layers. The height and surface geometry can be customised using a shaping tool. The material is extremely resistant to environmental influences and chemicals and can be combined with various [finishing options](#) - from classic screen printing to high-quality digital finishing.

Depending on your requirements and design demands, different variants are available - from classically soft to strikingly plastic:

- ✓ The **Classic Line** impresses with its gently curved surfaces and rounded edges. Particularly

RATHGEBER GmbH & Co KG - Kolpingring 3 - 82041 Oberhaching - Germany

Managing directors: Business economist (VWA) Andrea Schrägle, Dipl.-Wirtsch.-Ing. (FH) Andreas Schrägle

Commercial register entries: Andreas Schrägle GmbH

Registered office Munich: AG Mchn. B 44890, RATHGEBER GmbH & Co. KG: AG Mchn. A 8238 - VAT ID no.: DE 129 725 198

thin line thicknesses and a flexible, bendable structure also allow it to be used on slightly curved surfaces.

- ✓ The **Modern Line** offers a clear, contemporary look with almost flat surfaces and precisely moulded edges. The design is significantly stiffer and has a particularly high-quality appearance thanks to its flat look.
- ✓ The **Premium Line** stands for maximum design freedom in 3D: with pronounced structures, high stability and a robust feel, it is ideal for customised emblems with a strong spatial effect.

Whether shiny silver, brushed or deep black matt: CHROMOTION offers you a wide range of materials and basic colours that can be individually combined. Special colours and customised versions are also available for particularly demanding applications.

Our experienced team will provide you with expert support throughout the entire process. Discover CHROMOTION - your solution for individual design freedom with exceptional quality and versatility.

Technical data

Material	Plastic composite
Material thickness	min. approx. 0.6 mm to max. approx. 2.5 mm
Finishing options	Versatile surface geometry, Microprint, Embossing, Special and effect colors, Textured lacquer, Step facets, Material combinations
Printing process	Digital printing, Screen printing
Fastening	Self-adhesive, Hotmelt
Resistance to	Lye, Chemical cleaning agents, UV radiation, Mechanical stress, Acids, Unleaded gasoline, Weather conditions

Further options

- **Classic Line:** Gently curved, rounded, flexible - ideal for curved surfaces and fine lines.
 - **Modern Line:** Flat, angular, rigid - a clear look for high-quality, modern designs.
 - **Premium Line:** 3D moulded, stable, robust - for expressive emblems with depth.
