

DIGITAL SOLUTIONS

Digital twin

Digital solutions - your data, perfectly linked

Experience the future of object tracking and decision-making with our digital solutions. Our digital twin concept creates a precise virtual representation of your products and systems that maps their entire life cycle. Thanks to real-time data, simulations and advanced machine learning, we support you in making informed decisions and optimizing processes.

The **innovative "IDconnect" software solution** from our subsidiary smart-TEC enables you to implement the digital twin quickly and seamlessly. By integrating modern identification technologies such as NFC transponders and QR codes, we create a digital bridge to your physical products. Benefit from comprehensive transparency and efficiency for your projects. Benefits for you:

Real-time data integration: Precise mapping of the entire life cycle of your objects.
