

PANELS AND KEYBOARD FOILS

Keyboard foils and front panels

Your link to intuitive operation

As a keyboard membrane is the link between man and machine, its design and implementation is crucial for the intuitive operation of your system. The front panel is the face of your machine and at the same time the interface for communication.

RATHGEBER offers you a wide range of different materials and manufacturing technologies. You have maximum design freedom in the surface design and can use features such as translucent and transparent windows, haptic buttons using partial lacquer, embossing or ROYALPLAST.

Our experienced team is on hand with expert advice to help you find the perfect solution for your requirements. Contact us and discover how our keyboard foils and front panels can make your systems more user-friendly and aesthetically pleasing!
