

PLATES & LETTERING

Metal lettering - FINOCHROM®

FINOCHROM® for delicate metal lettering, logos, and symbols

FINOCHROM® is a marking solution for particularly intricate lettering, logos, and symbols made of nickel or stainless steel. The technology is ideal for applications requiring fine details, narrow lettering, precise contours, and a high-quality metallic finish. Even sharp corners and complex structures can be produced with high precision.

Compared to traditional signs or embossed emblems, FINOCHROM® focuses on the faithful reproduction of the finest elements. This makes the solution particularly well-suited for brand logos, product markings, and design elements where precision and a high-quality metallic appearance are paramount.

Whether for delicate logos, fine lettering, or precise symbols: With FINOCHROM®, even the most demanding design specifications can be faithfully reproduced in every detail. We'll work with you to determine the best technical approach for meeting your design requirements.
