Stainless steel signs

Stainless steel signs for heavy-duty use and demanding operating conditions

Stainless steel signs are durable labeling solutions for products, machinery, and industrial applications. They are used wherever durability, long-term legibility, and high resistance to environmental influences are required. Thanks to their corrosion-resistant properties, they are particularly well-suited for demanding operating conditions.

Depending on the application, stainless steel labels can be custom-designed and tailored to meet various requirements for labeling, identification, and brand presence. Compared to aluminum signs, the focus with stainless steel signs is primarily on high resistance to demanding environmental conditions and permanently robust labeling.

Whether for machinery, technical products, or industrial equipment, stainless steel signs combine durability with a high-quality appearance. We would be happy to advise you on the selection of materials, designs, and mounting options, and work with you to develop the right

solution for your application.

Technical data

Material	Stainless steel (V2A)
Material thickness	0.4 mm / 0.5 mm
Finishing options	Embossing, Brush structures, Laser marking, Microprint, Textured lacquer, Special and effect colors, Material combinations
Printing process	Digital printing, Screen printing
Fastening	Self-adhesive, Other mounting options such as drill holes, openings possible - always adapted to the respective requirements
Resistance to	Alcohols, Chemical cleaning agents, UV radiation, Mechanical stress, Weather conditions, Fuels, Fat
Further options	Identification systems: such as coding, numbering, RFID/NFC solutions, smart nameplate
